CIFT launches mobile application

SPECIAL CORRESPONDENT
KOCHI

The city-based Central Institute of Fisheries Technology (CIFT) under the Indian Council for Agricultural Research (ICAR) has developed a mobile application which can provide quick access to information on harvest and post-harvest fisheries aspects.

The application was launched by J.K. Jena, deputy director general (fisheries), ICAR, at the function held at ICAR-CIFT. C.N. Ravishankar, director, ICAR-CIFT, and B. A. Shyam Sundar, vice-president, Asian Fisheries Society Indian branch, were present on the occasion, said a press release here.

Mr. Jena lauded the efforts of ICAR-CIFT for undertaking need-based research for harvest and post-harvest fisheries sector as well as innovative mechanisms for disseminating research outputs. Besides fishing technologies and post-harvest technologies, the application provides information on quality assurance and management, biochemistry, nutrition, microbiology and engineering aspects.

The application may be freely downloaded from the Google Play Store.
