

ICAR-CIFT launches mobile app for fisheries technology

In an effort to leverage the potential of Information and Communication Technologies for disseminating the research outputs to public, the ICAR-Central Institute of Fisheries Technology developed a mobile app that provides quick access to information related to harvest and post-harvest aspects in fisheries. The application has been launched by Dr J K Jena, Deputy Director General (Fisheries), Indian Council of Agricultural Research at a function held at ICAR-CIFT. Dr C N Ravishankar, Director ICAR-CIFT and Dr B A Shyam Sundar, Vice President, Asian Fisheries Society Indian branch (AFSIB) were also present. Dr Jena lauded the efforts of ICAR-CIFT for undertaking need based research for harvest and post-harvest fisheries sector and innovative mechanisms for disseminating the research outputs. Dr C N Ravishankar, Director ICAR-CIFT said the application is quite user friendly and can be regularly updated.
