KOCHI

The ICAR-Central Institute of Fisheries Technology (CIFT) hosted a three-day international training programme on FAO Assessment Tool for Laboratories and Antimicrobial Resistance Surveillance Systems (FAO ATLASS).

Organised by the microbiology, fermentation and biotechnology division of CIFT, the event aimed to train researchers on using the FAO ATLASS tool to tackle antimicrobial resistance, said a press release here.

The programme brought together 31 researchers from the Indian Network for Fisheries and Animal Sciences on Antimicrobial Resistance.
